Investment Objective and Strategies

The Tangerine Balanced Income Portfolio (the “Fund”) seeks to provide income with a secondary focus on capital appreciation by investing in both fixed income and equity securities based on a targeted allocation among four different types of investments in the following proportions:

Each of the four investment types seek to replicate, as closely as possible, the performance of a recognized securities index. Currently, the Canadian bond component seeks to replicate the FTSE Canada Universe Bond Index; the Canadian equities component seeks to replicate the S&P/TSX 60 Index; the U.S. equities component seeks to replicate the S&P 500 Index; and the international equities component seeks to replicate the MSCI EAFE Index.

Risk

The risks associated with investing in the Fund are as described in the Simplified Prospectus. There were no material changes to the Fund over the year that affected the overall level of risk of the Fund.

Results of Operations

The Fund had net assets of \$499 million at December 31, 2020 and \$409 million at December 31, 2019. The Fund’s net assets grew by \$89 million over the one-year period ending on December 31, 2020. This growth in the Fund’s net assets was primarily due to an increase in net assets from operations of \$35 million and from net sales of \$54 million.

Investment Results

The Fund’s return for the year ended December 31, 2020 was 8.5% versus 9.6% for the Fund’s product benchmark*. Unlike the benchmark, the Fund’s return is quoted after the deduction of fees and expenses.

The discussion below regarding the performance of the indices that make up the Fund’s benchmark is also reflective of the corresponding components of the Fund.

The above returns were impacted by macro-economic conditions including, but not limited to, the following:

The global economy faced an unprecedented shock in March and April as the result of government-imposed lockdowns to contain the spread of COVID-19. Policymakers responded with massive, broad-based fiscal and monetary stimulus to support affected workers and businesses in record time. As encouraging data began to emerge in the second quarter of 2020, indicating that the stimulus support and re-opening plans were gaining traction, global equity markets began a rebound from their March lows. The market recovery continued in July and August on the back of positive economic momentum and earnings data, but lost its momentum in September as fiscal support waned and economic growth remained restricted given the persistent and rising number of COVID-19 cases. This slowdown proved to be short-lived, however, as markets resumed their progression in the fourth quarter on positive vaccine news and the U.S. election results.

Canadian stocks, as measured by the S&P/TSX 60 Index, finished the year up 5.6% as first-quarter losses were more than offset by subsequent gains. Similarly, international equities, as measured by the MSCI EAFE Index, rose 5.9% in Canadian-dollar terms. In the U.S., the S&P 500 Index ended the year up 16.3% in Canadian-dollar terms despite the weakness of the U.S. dollar relative to the Canadian dollar.

In parallel to equity markets, the Canadian bond market, as measured by the FTSE Canada Universe Bond Index, also finished the year in positive territory. The market rose 8.7% as bond yields declined in reaction to stimulus measures and policy rate decreases implemented by central banks to help counter the swift decline in financial markets early in the year.

* See the Annual Compound Returns section for the composition of the Fund’s product benchmark.

Annual MRFP for the year ended December 31, 2020

Canadian Bonds

Within the Fund's Canadian fixed income component, all sectors of the broad-based FTSE Canada Universe Bond Index contributed to performance, led by the Communication sector and followed by the Infrastructure and Municipal sectors. Brookfield Renewable Partners L.P. (4.29%, 11/05/2049), Bruce Power L.P. (4.746%, 06/21/2049) and Government of Canada (2.75%, 12/01/2064) were the strongest-performing holdings. Conversely, the Securitization, Financial and Agency sectors were the weakest-performing index sectors. BMW Canada Inc. (2.8%, 01/28/2021), Cominar Real Estate Investment Trust (4.247%, 05/25/2023) and Cadillac Fairview Finance Trust (4.31%, 01/25/2021) were the weakest-performing holdings.

Canadian Equities

Within the Fund's Canadian equities component, the Information Technology sector posted the highest return, followed by Materials and Industrials. Meanwhile, the Financials, Energy and Communication Services sectors had negative returns during the period. The best-performing securities within the S&P/TSX 60 Index were Shopify Inc. (Class A), Canadian National Railway Co. and Barrick Gold Corp. Suncor Energy Inc., Enbridge Inc. and TC Energy Corp. were the worst-performing securities within the index.

U.S. Equities

Within the Fund's U.S. equities component, Information Technology posted the highest return, followed by the Consumer Discretionary and Communication Services sectors. Energy stocks had sharply negative returns, while the Real Estate and Financials sectors also underperformed. From an individual securities perspective, the best-performing stocks within the S&P 500 Index were Apple Inc., Amazon.com, Inc. and Microsoft Corp., each of which returned over 54% for the period. Exxon Mobil Corp., Wells Fargo & Company and The Boeing Co. were the worst-performing stocks within the index.

International Equities

Within the Fund's international equities component, the best-performing sector was Information Technology, followed by Consumer Discretionary and Health Care, while the Financials, Energy and Real Estate securities had negative returns. The best-performing securities within the MSCI EAFE Index during the period were ASML Holding N.V., SoftBank Group Corp. and LVMH Moët Hennessy Louis Vuitton SE. The worst-performing securities were HSBC Holdings Plc, BP p.l.c. and Royal Dutch Shell PLC (Class A).

Recent Developments

The sub-advisor's objective is to match and replicate the four indices' security holdings, weightings and characteristics, and weight each asset class according to the allocations outlined in the Fund's investment objectives. The Fund will continue to follow this objective going forward.

COVID-19

The spread of the COVID-19 virus began in late 2019 and led to a subsequent and dramatic global shutdown by March 2020 of all but the most essential activities. Many businesses and schools were closed along with borders as mobility restrictions were put in place around the world. This generated significant headwinds for corporate and consumer income which led to an increase in financial market volatility. In late March, markets began to see a dramatic reversal with investors encouraged by the amount of stimulus being introduced into the financial system by global policy makers. Trillions of dollars of supplementary income, tax relief, and lending backstops were put into place. The recovery continued throughout the course of 2020 with many markets seeing sharp recoveries, although not all sectors and industries participated in the recovery with sectors such as travel, energy and real estate continuing to lag. A globally coordinated approach to vaccine development continued throughout the second half of the year with Pfizer and Moderna both developing and starting to distribute a vaccine in record time. The rollout of the vaccine progressed around the world through the end of 2020 which continued to buoy markets. For now, we continue to monitor the situation and the effects on the Fund.

Related-Party Transactions

Affiliates of Tangerine Investment Management Inc. may earn fees and spreads in connection with various services provided to, or transactions with the Fund, including securities lending transactions and other services as described below:

Securities Lending Transactions

The Fund did not participate in securities lending transactions with a related party during the period.

Buying and Selling Securities

Tangerine Investment Management Inc. has established an Independent Review Committee ("IRC") which acts as an impartial and independent committee to review and provide recommendations or, in certain cases, approvals respecting any conflict of interest matters referred to it by the Manager.

The Manager and the Fund relied on standing instructions from the IRC in respect of one or more of the following types of transactions:

- Investing in or holding securities of a related issuer.
- Paying brokerage commissions and spreads to a related party for effecting security transactions on an agency and principal basis on behalf of the Fund.
- Investments in the securities of issuers for which a related underwriter acted as an underwriter during the distribution of such securities and the 60-day period following the completion of such distribution.

The applicable standing instructions require that investment decisions relating to the above types of transactions, among other relevant terms and conditions of the Manager's conflict policies and procedures, (i) are made free from any influence by the Manager or any entity related to the Manager and without taking into account any considerations relevant to the Manager or any entity related to the Manager; (ii) represent the business judgment of the portfolio advisor uninfluenced by any consideration other than the best interests of the Fund; and (iii) achieve a fair and reasonable result for the Fund.

- Notes:**
- (1) This information is derived from the Fund's annual audited financial statements. The information for the net asset per unit section of the financial highlights are based on International Financial Reporting Standards ("IFRS").
 - (2) Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the financial year.
 - (3) Distributions were paid in cash/reinvested in additional units of the Fund, or both.
 - (4) This information is provided as at December 31 of the year shown.
 - (5) Management expense ratio ("MER") is based on total expenses plus harmonized sales tax (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the year. The manager absorbed certain expenses of the fund. Such absorptions may be terminated at any time without notice.
 - (6) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the year.
 - (7) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a portfolio turnover rate in a period, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance.

Management Fees

The breakdown of services received by Tangerine Investment Management Inc. as a percentage of management fees earned is as follows:

Management Fees	Distribution	Other*
0.80%	50%	50%

*Includes investment advisory fees, administration fees

Past Performance

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional units of the Fund and would be lower if the distributions were not reinvested. In addition, the performance information does not take into account any income taxes that may have been paid by investors who have invested in non-registered accounts. Past performance does not necessarily indicate how the Fund may perform in the future.

Year-by-Year Returns

The chart below indicates the Fund's performance in each of the years shown and illustrates how the Fund's performance has changed from year to year. The chart demonstrates, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the last day of each financial year.

Annual Compound Returns

The following table shows the annual compound total returns of the Fund for each of the years indicated ending on December 31, 2020, compared with the following benchmarks:

Percentage return (%)	Past 10 years	Past 5 years	Past 3 years	Past year
Tangerine Balanced Income Portfolio	5.4%	5.0%	5.7%	8.5%
